

Our Ref: GKGN0602

13/12/2022

Dear Stakeholder

Consultation on the: GKGN0602 issue 1, Guidance on Train Rooftop Antenna Positioning

The CCS Standards Committee has considered the business case for change to revise the documents listed above. They would welcome your comments on this change.

The purpose of this guidance note on train rooftop antenna positioning is intended to assist infrastructure managers, railway undertakings and other organisations required to fit antennas on train rooftops in relation to good practice for train rooftop antenna positioning. The scope of the guidance note is the onboard arrangements for implementing and installing rooftop radio antennas that support legacy, emerging digital radio communication systems and Global Navigation Satellite Systems (GNSS) on the GB railway.

We would like to have your comments and have provided a consultation form for you to use. Our consultation closes on 17/01/2023, and all comments submitted by that date will be considered, we are unlikely to be able to respond to comments received after that date. Your comments and personal information (name, job title and organisation) will be recorded in the consultation response summary circulated to standards committees and other interested parties in the rail industry to assist with informed responses to your comments. All consultation comments and your personal information will be published on the standards consultations site (<https://consultations.rssb.co.uk/>) unless you ask us not to publish your personal information.

I look forward to hearing from you and thank you for your time.

Yours faithfully

Cristina Musat
Project Manager
